

CONTENT

- 6 INTRODUCTION
- 7 Mathematical models of the cyclic work package distribution task
Bezkorovainyi V., Bezuhla H., Cholombytko D.
- 16 Decision making support under conditions of incomplete consistency
of expert advantages
Beskorovainyi V., Kolesnyk L., Russkin V.
- 27 Application of the cognitive approach in the field of project management
Chernova L., Zhuravel I., Chernova L.
- 35 Methodology of architecture-oriented synthesis in component design
aerospace complexes
Fedorovich O., Uruskyi O., Kosenko V., Lutai L., Zamirets I.
- 87 Mission and strategy of the compliance program of metallurgical enterprise
development management
Fonarova T., Petrenko V., Bushuiev K.
- 96 The role of innovative technologies in the process of training project managers
Molokanova V.
- 105 Development of a methodology for solving problems
of selecting informative attributes that characterize the state
of the life cycle of radio electronic means
Mospan D., Starodubcev N., Nevliudova V., Klymenko O.
- 117 Conceptual framework for the automation of the monitoring system
of natural emergencies synthesis
Nefodov L., Fil N.
- 124 Technology of distributed management of production processes with the use
of a service-oriented approach
Nevliudov I., Novoselov S.
- 139 Choice of informative attributes for monitoring of the electronic components
of automatics lifecycle
Nevliudov I., Andrushevich A., Starodubcev N., Demska N., Vzhesnievskyi M.
- 151 Multiflowed software motion control technology for a two-link manipulator
with four degrees of freedom
Novoselov S., Sychova O., Tesliuk S.
- 164 Structural and parametrical synthesis of the laws of critical control
Timofeyev V., Khrustalova S., Khrustalev K., Yakushyk I.
- 178 Portfolio management for public participation projects
Vorkut T., Petunin A., Sribna N., Kharuta V., Khrutba Yu.
